4 Ways to Spot a Poor Quality Survey Respondent

# RESEARCH QUESTION

What is the main driver of bad data quality: Poor survey respondents or poor survey experience?

# HERE'S WHAT WE FOUND

**Bad survey data comes from bad  
survey respondents.  
But poor survey experience can make  
things worse.**

# CONCLUSIONS

Even under ideal conditions, close to 30% of survey takers are fraudulent or disengaged. They make us see things that are not there.

A disengaged respondent profile can be identified and removed prior to the survey.

Avoid LSD effects in your research.
